

# Embracing a Green Cleaning Innovation

## Electrically Activated Water Technology (EAW)

**kills 99.999 percent of common bacteria** with a simple six-second spray of non-toxic ionized water.

- We're helping to lower our Carbon Footprint.
- Cleaning with EAW instead of traditional chemicals reduces energy consumption and pollution formation between 97% and 100%.
- It's better for our employees.
- A safe and sustainable cleaning is free and clear of chemical-related health warnings.

**Look for the blue lights to discover a greener clean.**

**Unearthing our earthy side.**
